

## **402.02, Bituminous Materials Emulsified Asphalt (SS-1 or CSS-1)**

### **Qualification Requests**

On the laboratory test report that is sent in with the request, the test data must show that the material is in compliance with subsection 702.01(6) Bituminous Materials Emulsified Asphalt (SS-1 or CSS-1).

### **Qualification samples**

The requirements for samples that are received for QPL prequalification are as follows.

- ◆ The producer will submit a minimum of two samples (1 quart containers) for each type of emulsion to be considered along with test results from an independent laboratory.
- ◆ MDT will test each sample according to the tests outlined in subsection "702.01(6) Emulsified Asphalt". The material will be rejected if the material does not meet the requirements.

### **Material Requirements**

Emulsified Asphalt (SS-1 or CSS-1) must meet the requirements listed in AASHTO M 140 Table 1 or AASHTO M 208 Table 1. All testing and reporting is to conform to the above requirements whether it is for the quality control test reports, random or auditing test, or for disqualification or requalification.
